Technical Proficiencies

- AI/ML
- Web development
- Programming
- Prompt engineering

Soft Skills

- Strategic Leadership
- Communication
- Problem Solving
- Productivity

Interests

- Legal Tech
- Ethical AI

I am a results-driven AI Developer and Technical Specialist with a deep passion for building ethical, high-impact technology. Having transitioned from web development into specialized AI systems through the Capaciti AI Bootcamp, I focus on bridging the gap between complex data and human accessibility. My expertise lies in integrating Vision, Language, and Speech APIs to solve real-world challenges—ranging from legal accessibility with Contract Guard to auditing financial models for age-based bias. I am committed to developing transparent, accessible intelligent systems that empower the South African community.

Education

- National Diploma in Software Development | IIE Rosebank college 2023-2025

Work Experience

- Digital Associate | Capaciti AI Bootcamp | Dec 2025 – current
Developed and deployed 4–5 AI-powered tools, focusing on multi-modal API integration and LLM scaling.
Conducted rigorous bias audits on financial datasets to mitigate age-based discrimination.

Achievements and Key Projects

- Coursera certifications | Professional Development Badge | 2026
- Coursera certifications | Artificial Intelligence Bootcamp | 2026
- Contract Guard (Capstone Project):
Built a multi-modal tool for legal accessibility using Vision and Speech APIs to simplify complex South African legal jargon.
- Bias Audit Financial Credit Scoring:
Investigated age-based bias in automated lending; implemented Reweighing and Threshold Moving strategies to ensure fairness.
